

PACKED BED SCRUBBER SYSTEM-VERTICAL

- ❖ Packed bed scrubber system is versatile and custom designed to treat and remove a range of inorganic gaseous such as sulphuric acid, ammonia, chlorine and odour from industrial exhaust stream.
- ❖ Optimum the system performance by combination of high efficiency reliable packing media with continuous liquid spray system intermixing, and low pressure drop.
- ❖ Capacity range from 1,000CFM up to 40,000CFM.

BENEFIT & FEATURES

- ☐ Water Recycling complete with recirculation piping system & holding tanks.
- ☐ Easy maintenance c/w Auto-dosing chemical system.
- ☐ Reliable and chemical resistance construction material for all the contact surface body.
- ☐ A high-efficiency mist eliminator removes 90-95% entrained liquid.
- ☐ Clear view point and packing refilled door.
- ☐ Complete with monitoring instruments such as DP Gauge, rotameter, flow meter gauge and Y-strainers to prevent the pump damage and nozzle plugging
- ☐ Available with corrosion resistance, FRP & PP blowers.
- ☐ Control Panel skids complete with motor control, liquid sensor (high & low) alarms system, PH & Temperature indicator.

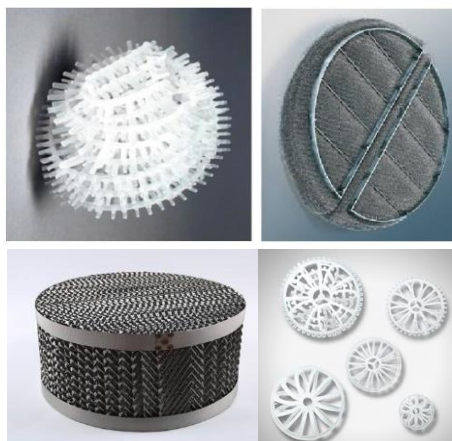

GENERAL PACKED SCRUBBER MAINTENANCE KITS

PACKING MEDIA

MIST ELIMINATOR

SPRAY NOZZLES

MONITORING INSTRUMENTS

DP GAUGE, DRAIN VALVE & TUBING

THERMOCOUPLE

ROTAMETER & FLOW GAUGE

OTHERS SERVICE:

UPGRADING, REPAIRING , SCRUBBER PACKING MEDIA CHANGES & ALKALINE CLEANING
